species to your site.**

Tubestock

Plants are mostly propagated on site, using our own seed. Tubestock surplus to our project requirements is available for sale on Fridays, or at our seasonal sales.

For retail quantities, tubestock is typically \$3 to \$6, depending upon the size of the tube and the particular species selected.

Rare Plants

Spectacular *Helmholtzia glabberrima*, an endangered species from northern NSW, long-lasting flowers over summer. Available in tubes, advanced or superadvanced sizes. In bud now. Needs a moist spot with morning sun. To 1.5m high, 1.5m wide.

Advanced plants

Here is a 25L Cordyline petiolaris.

A selection of advanced plants is available in 25L, 50L and 100L.

Some trees take many years to flower – buy a mature, flowering tree. large trees

Superadvanced Plants

Here a 200 litre plant has its roots inspected, as it is potted on.

Small numbers of super-advanced trees are available, particularly lillypillies and figs.

A delivery and planting service is available for our large trees.
